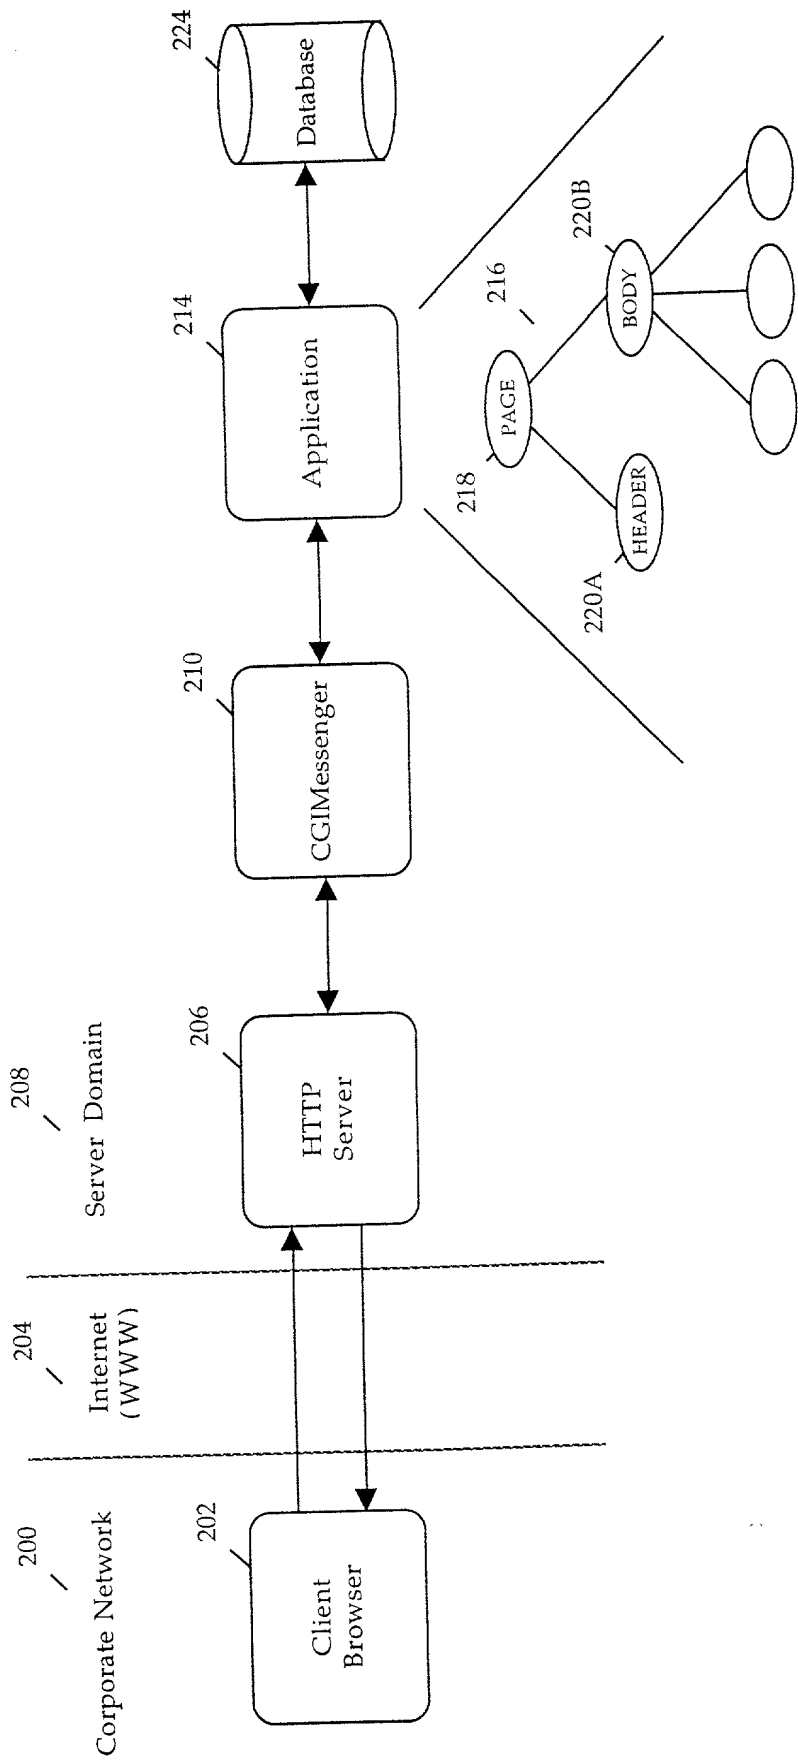

Figure 2

FIG. 3A is a block diagram of a system architecture. The system includes a network 310 connecting four clients 302, 304, 306, and 308 to a server system 312. The server system 312 includes an HTTP Server CGI 322, an Application Server 316, and a Database Server 318. The Application Server 316 is further divided into an Automobile Shopper's 320. Bidirectional communication is shown between the clients and the network, and between the HTTP Server CGI 322 and the Application Server 316. Bidirectional communication is also shown between the Application Server 316 and the Database Server 318.

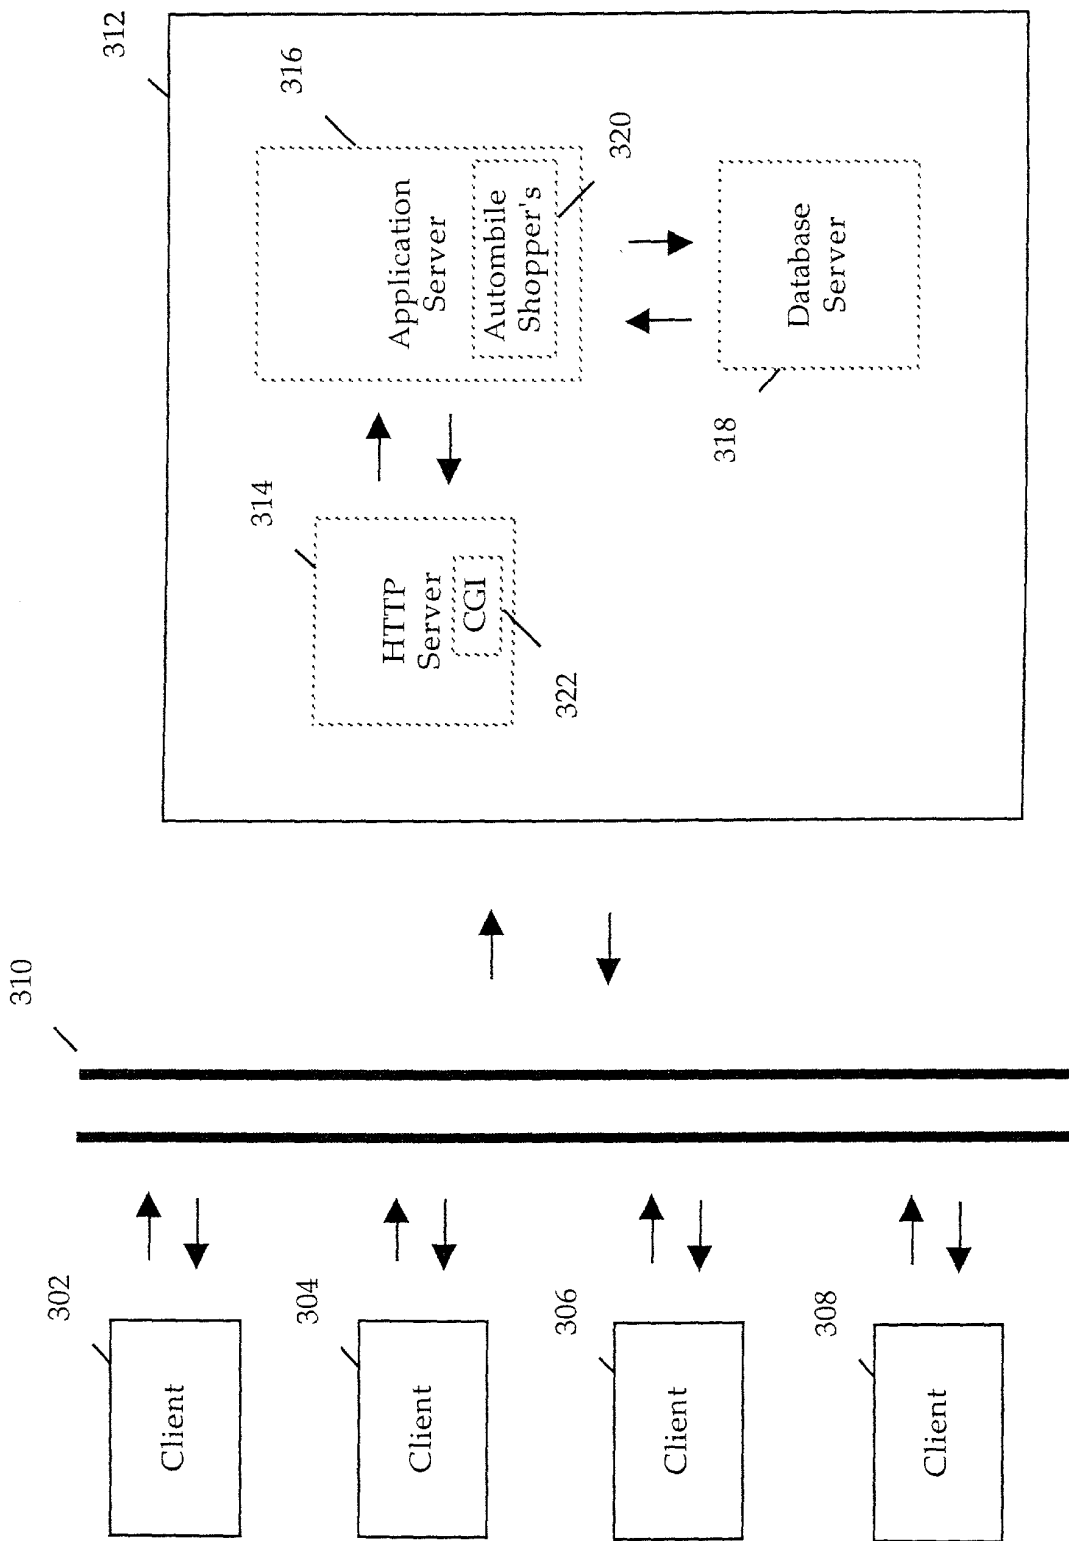

Figure 3A

Figure 3B is a schematic diagram of a user interface for a car dealership website. The interface is divided into several sections. At the top left is a 'Welcome' message. Below it are three columns: 'Models', 'Price', and 'Type', each with a dashed box for input. To the right of these columns is a 'Sort by:' label and a 'Display cars' button. Below the 'Sort by:' label is a dashed box for input. The interface is further divided into three main sections: 332 (top left), 334 (middle left), and 336 (bottom right). Section 332 contains the 'Welcome' message and the input fields. Section 334 contains two identical car listings, each with a dashed box for an 'Image', followed by 'Model:', 'Type:', and 'Price:' labels. Section 336 contains a grid of four dashed boxes labeled 'Dealers', 'Colors', 'Package D', and 'Package F'.
